CUSTOM COLOURS

Painted Items

All our painted items have a Polyurethane (2 Pack) painted finish to the front and the edges. The back is always white melamine (unpainted).

Polyurethane consists of paint and hardener that provides a protective coating very similar to the paint you see on motor vehicles.

Our standard painted finish is MATT 10% (i.e., not Gloss or Satin).

Custom Colour:

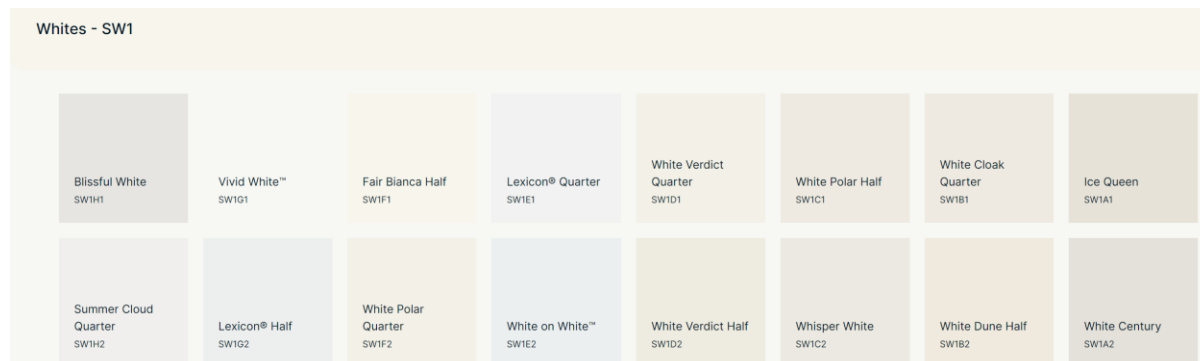

We can have your items painted in any Dulux colour. Find your code in the [Dulux Colour Atlas](#). Please look for the colour code under "colour specification". It is a combination of letters and numbers.

In our shop, select "Custom colour from Dulux" as the colour option on each item. Then enter the Dulux colour code in the "ADD NOTE" section of your Cart at checkout.

If the finish isn't specified it will come in **MATT Finish**.

If you would like a different finish, please don't forget to specify it! (**MATT, SATIN, SEMI-GLOSS, HIGH-GLOSS**).
