DIY:

DIY/RAW option is for you to sand and paint yourself. These doors will be raw on one side. The back of the front/panel is white melamine. You can use either a brush/roller or a spray system to paint it.

Our DIY collection fronts/panels are "Straight off the Saw" and not sanded prior delivery. Sanding is a must to achieve a nice finish. Slim shaker, French Shaker, Shaker, Arch, Chevron, Mermaid, and Diamond collections are considered as difficult for DYER.

Doors with a profile/pattern require more attention to details, more sanding and can be difficult to achieve a nice finish. Using a professional painter is recommended.

If you are not familiar with the process and don't have a professional painter, we recommend buying our painted finish products.

RAW MDF is subject to bowing if not stored on a flat surface and in a dry area.

Do not store vertically.

Do not store in humid areas.

Paint as soon as possible to avoid water damaged or humidity to penetrate the MDF.

OTHER INFO:

We only supply the actual doors. All hinges and cabinets will need to be purchased from IKEA separately. (These will come with all necessary screws).

The doors/drawers come with all the necessary predrilled hinge holes/holes.

NOTE:

Some designs are not available in all sizes due to the pattern configuration (E.g.- Shaker styles are not available on 10cm high drawer fronts. Chevron is not available on 30cm wide doors or drawer fronts).
